PROFESSIONAL SUMMARY

Principal Frontend Engineer with expertise in React, Next.js, Webflow Enterprise, and scalable component-driven architecture. Proven track record leading cross-functional web platform initiatives, modernizing front-end systems, and improving deployment velocity, SEO performance, and conversion optimization. Built enterprise marketing and product ecosystems supporting \$1.8B+ in annual fintech processing volume while collaborating with executive stakeholders and cross-functional teams to drive frontend platform strategy and digital modernization initiatives.

IMPACT HIGHLIGHTS

- Reduced enterprise web deployment cycles from weeks to hours through the architecture and implementation of a scalable Webflow Enterprise platform.
- Led frontend implementation for a fintech platform supporting \$1.8B+ in annual payment processing volume.
- Improved Core Web Vitals performance by 40% (LCP 1.2s), contributing to a 15% increase in organic traffic.
- Contributed to a 35% increase in MQL-to-Closed-Won conversion through frontend optimization, landing page improvements, and marketing funnel enhancements.
- Architected reusable React/Next.js component systems that reduced development time for new features by up to 50%.

TECHNICAL SKILLS

Frontend Engineering

React, Next.js, JavaScript (ES6+), TypeScript, HTML5, CSS3/Sass, TailwindCSS, Material UI, Responsive Design, Component Architecture, Design Systems, Accessibility (WCAG), Server-Side Rendering (SSR), Static Site Generation (SSG), State Management

CMS & Web Platforms

Webflow Enterprise, WordPress, Sanity CMS, Headless CMS Architecture

APIs & Backend

REST APIs, GraphQL, Supabase, SQL Server, Node.js, Third-Party API Integrations

Analytics & MarTech

GA4, GTM, Salesforce, Marketo, Pardot, HubSpot, Wistia, Navattic

DevOps & Workflow

Git/GitHub, Jira, Agile/Scrum, CI/CD, Vercel, NPM/Yarn, Technical SEO, Core Web Vitals, Performance Optimization, Bundle Optimization, Lazy Loading, Answer Engine Optimization (AEO)

PROFESSIONAL EXPERIENCE

WorkWave, LLC. | Holmdel, NJ | Aug 2018 – Mar 2026

Principal Frontend Engineer | Mar 2023 – Mar 2026

- **Hands-On Platform Re-architecture:** Personally architected and built a component-based Webflow Enterprise stack, cutting deployment time by >80% and enabling same-day campaign launches.
- **Technical Leadership & Architecture:** Defined scalable frontend standards, component governance, and platform best practices across enterprise web properties.
- **Platform Modernization:** Led modernization initiatives across React, Webflow Enterprise, and CMS architecture, including the migration of four enterprise websites while preserving SEO integrity and feature parity.
- **Cross-Functional Leadership:** Partnered with product, marketing, and design stakeholders to align frontend platform capabilities with business, UX, and conversion goals.
- **Operational Excellence Award (2022):** Built a custom Jira-based marketing workflow system that standardized intake processes and reduced average cycle time by 25%.
- **Custom Tool Development:** Built JavaScript-based ROI calculators and Calendly API integrations that streamlined lead capture and reduced conversion friction.
- **Fintech Implementation:** Spearheaded the front-end build for the WorkWave Payments launch, supporting \$1.8B in annual processing volume.

Senior Web Developer | Jan 2020 – Mar 2023

- **Workflow Optimization:** Improved development workflows, decreasing average cycle time by 25% and accelerating time-to-market for key features.
- **Design Systems & Component Architecture:** Developed scalable design systems and reusable React/Next.js component libraries integrated with Sanity CMS for enterprise marketing platforms, reducing development time for new features by 30–50%.
- **Microsite Execution:** Developed and launched high-performance microsites for global Sales Kickoffs (SKO) and executive events, maintaining 100% uptime.
- **Mentorship & Team Development:** Mentored and guided mid-level engineers through frontend best practices, contributing to multiple internal promotions to Senior Web Developer roles.

Web Developer | Aug 2018 – Dec 2019

- **Performance Engineering:** Delivered responsive, high-performance web applications using HTML5, JavaScript, and WordPress.
- **Accessibility & UX Standards:** Implemented accessible, responsive interfaces aligned with WCAG accessibility standards and Core Web Vitals optimization best practices.
- **Optimization:** Improved Core Web Vitals by 40% (LCP 1.2s), resulting in a 15% lift in organic traffic.

Brother International Corporation, Inc. | Bridgewater, NJ | Jul 2007 – Aug 2018

Web Application Developer

- **Enterprise Application Development:** Engineered scalable internal and customer-facing applications using ASP.NET, C#, and MVC frameworks to support high-volume enterprise operations.
- **Agile Team Leadership:** Led Agile development initiatives for a cross-functional engineering team, improving sprint delivery timelines and operational efficiency by 30%.

Bare Necessities | Avenel, NJ | 2003 – 2007

Internet Programmer/Analyst

- **Internal Application Development:** Developed enterprise merchandising and product segmentation tools using ASP.NET and SQL Server technologies.
- **Systems Integration:** Built third-party integrations for order processing and real-time shipping workflows using ASP/XML and external APIs.

EARLIER EXPERIENCE

Web Developer/Consultant — TEKsystems

2001–2007

EDUCATION

- BS, Management and Consumer Studies | University of Maryland
- Certificate in Computer Programming | DeVry Technical Institute
